OBJECTIVE

A highly motivated Computer Science and Engineering student with a passion for software development, machine learning, and data science. Seeking an internship/full-time opportunity where I can apply my skills in coding, problem-solving, and collaborative teamwork to contribute to the company's success while further developing my technical expertise.

EDUCATION

PRE-UNIVERSITY (PU) IN PCMC

2020 - 2022

Manasarowar Pushkarini Vidyasharama Mysuru, India

BACHELOR OF ENGINEERING IN CSE - (CGPA- 7.60)

2022 - 2026 (EXPECTED)

Vidya Vikas Institute of Engineering and Technology - VVIET Mysuru, India

SKILLS

- Programming: Familiar with C, Java, JavaScript, HTML, and CSS; actively improving coding skills through projects and practice
- Prompt Engineering: Designing & optimizing AI prompts
- Web Development: Front-end design
- Machine Learning & AI: Model integration
- Project Management: Planning & coordination

WORK EXPERIENCE

2025, JULY

Project Manager – Anantha Jyothi Prathishthana

- Led multiple community-driven projects ensuring smooth planning & execution.
- Managed cross-functional teams & coordinated stakeholders.
- Applied prompt engineering techniques to streamline AI solutions.

Data Science and Machine Learning Intern – IIMSTC, Bengaluru

- Worked on data analysis, preprocessing, and machine learning projects.
- Gained hands-on experience with Python and real-world datasets

PROJECTS

Two-Way ISL Translating System

- AI-powered system translating between ISL and text/speech.
- Uses computer vision, deep learning & NLP for high accuracy.

Skin Disease Detection Web Application

- Web app using ML for skin disease detection.
- Built responsive UI with HTML, CSS & Java.

FITYNTRA An Adaptive AI/ML-Driven Fitness and Nutrition Platform with Injury-Aware Wellness Support

- Developed "FITYNTRA", an AI/ML-based fitness and nutrition platform delivering personalized wellness recommendations.
- Integrated calorie prediction and injury-aware support using modern web technologies.

Ocean Acidity Level Categorization

- Developed an Ocean Acidity Level Categorization system using Machine Learning for marine ecosystem monitoring.
- Classified coastal regions into Safe, Vulnerable, and Critical zones using ocean pH and shipping traffic data.

AI-based Contributions

- Worked on AI automation projects & optimized prompt designs.

LEADERSHIP & ACTIVITIES

- Led multiple technical & cultural events (Event Organisation).
- Participated in hackathons & technical events.
- Documented college sports events.

EXTRA-CURRICULAR ACTIVITIES & HOBBIES

- Playing SPORTS (STATE LEVEL RUNNER UP)
- Coding
- Listening to Tech & Startup Podcasts
- Updating with Tech Trends
